

RADISH

INTERNATIONAL MARKETS

ROUND

A range of colourful and ravishing radishes

BACCHUS HF1

The purple radish crunchy and tasty

Bright purple round root with a nice white flesh. Crunchy and tasty.

Thin taproot. Upright foliage and good leaf attachment, easy to pick up.

Bacchus is a hybrid variety with a short crop cycle.

For spring and summer harvests, for indoor or open field crops.

CIRCUS HF1

The classic European style

Red round root with a thin taproot. Resists cracking and hollowing.

Dark green and upright foliage, providing an easy pick up.

Circus is a hybrid variety with a short crop cycle, also suitable for pre-pack markets.

For spring and summer harvests, for indoor or open field crops.

ANGELUS

A pure white colour and tolerant to downy mildiou

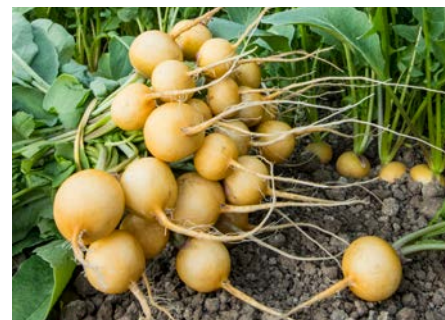

Pure white skin on the whole root.

Very uniform and round bulb. Resistant to cracking and hollowing.

Upright foliage, good leaf attachment.

Variety with intermediate resistance to downy mildew.

For spring and summer harvests, for indoor or open field crop.

HORUS

A bright colour and a sweet taste

Attractive and homogeneous yellow skin colour.

White flesh.

Quality root, very round and smooth. Resistant to cracking and hollowing.

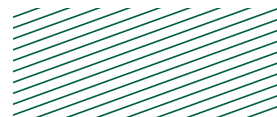

For spring and summer harvests, for indoor or open field crops.

For an optimum colour, consider a gentle cleaning way (soaking or low pressure).

FRENCH BREAKFAST

DIABLUS HF1

Brightness and post-harvest shelf-life

Half-long hybrid radish with 1/4 to 1/3 of white tip and controlled pure green foliage. Well shaped cylindrical root tolerant to pithiness. Perfectly suited for mechanical harvesting, easy bunching. Brightness and good post-harvest shelf-life. Very good performance in low warmed soil. Variety developed for protected crops in spring and early fall and for open field crops. Improved resistance to downy mildew on leaves and roots (IR).

ARTUS HF1

Ideal for cold periods

Half-long hybrid radish with 1/4 à 1/5 of white tip, green foliage and sweet flesh. Cylindrical root tolerant to pithiness. Strong foliage attach well suited for mechanical harvesting. Variety with a short cycle, for protected crops in growing days. Good growth in cold periods. Enhanced resistance to downy mildew on foliage (IR)

MIRABEAU HF1

Fast cycle and very sweet flesh

Hybrid half-long radish, with about 1/4 of white. Very sweet and firm flesh. Cylindrical root of an attractive bright red colour and tolerant to pithiness. Vigorous, short cycle variety, developed for protected crops in spring and autumn and for open field crops. Strong foliage of medium vigor and good attach.

NELSON

Good presentation and versatility

Half-long radish with a very small white tip. Very attractive well shaped cylindrical root of a bright red colour. Tolerant to pithiness. Short and erected leaves with a very good attach. Easy bunching and adapted to mechanical harvesting. Versatile variety, for protected crops. May be suitable for open field crops.
