

OUTDOOR LETTUCE

INTERNATIONAL MARKETS 2023

Back in 1952, Jacques-Paul and Henri GAUTIER started a seeds production activity together. Thanks to their work and their perseverance, but also to the bonds of trust and friendship forged along their way, they have made their business sustainable.

70 years later, the Gautier family together with all Gautier Semences' team carry this success. More than ever, we are looking towards the future in order to support agricultural production and vegetal food supply. Our ambition is to become the benchmark seed company for partners and consumers who are looking for the best of plants: health, pleasure, responsibility.

Strongly committed to providing all players in the sector with healthy, tasty and more sustainably produced vegetables, we offer a wide range of varieties that you will find in this new Outdoor Lettuces brochure for the 2023 season.

The team Gautier Semences

HEADLINES THIS SEASON

CARLITO Sr2043

Volume in deep red

ENCIERRO C3049**

Very good resistance
to necrosis and bolting

OLANICE P2124**

Field standing ability
in warm conditions

CELISTRA E2110

Earliness, resistance
and long cycle

BELICOS F2113

Resistances and high quality

KETALET G1435**

Performance in all conditions

MORE THAN 20 YEARS OF EXPERTISE IN ORGANIC AGRICULTURE

Since our Ecocert certification in 1998, we are committed to offering you an ever-expanding range of lettuce that allows to cover all types.

Identify our available organic varieties with the logo **+ ORGANIC**

Cycle

- Cold and difficult growing conditions
- Good growing conditions
- Very hot growing conditions

Volume: ● Low ●●● High

Tip burn / Bolting tolerance: ● Low ●●● High

Recognize resistant varieties to Fol:1 and/or Fol:4
with the Fuz Control® logo

Abbreviations & diseases :

Bl: Bremia Lactucae or mildew

Nr: Aphid Nasonovia Ribisnigri

LMV: Lettuce Mosaic Virus

Fol: Fusariosi vascolare, *Fusarium oxysporum f.sp. lactucae*

HR: Standard or High Resistance

IR: Moderate or Intermediate Resistance

**Variety under provisional sales authorization, denomination under validation.
The advice and suggestions are provided for guidance only and can not, therefore, include a guarantee of results.
All varieties illustrated in this paper have been photographed under favorable conditions, their behaviour can vary on individual culture conditions.

The logo consists of three overlapping circles in shades of red and magenta. The text "Red Crush" is written in a white, serif font, centered within the circles.

Red Crush

RED RIGHT
TO THE HEART

To learn more about our brand, find our dedicated
brochure by scanning the following QR code:

VOLCANA Er2114

The Red Crush® little gem

HR Bl: 16,20-22,25,27,30-32,37EU

Variety with appealing crunchy leaves, it features an upright habit and dense, intense red heart. It is grown in open field in hot conditions and is also suitable for hydroponic cultivation.

N2061*

The Red Crush® mini-cos

HR Bl: 16-21,23-37EU

It stands out for its smooth, subtle red foliage and its very light, slightly sugary taste. It is cultivated in temperate conditions in open field.

REDIGO 2

The Red Crush® multi-leaf

HR Bl: 16-37EU **IR** Fol:1, Fol:4

This multileaf is a red-batavia type with incised leaves. Its intense red coloring tapers prettily from the edge of the leaf to the blade. A product that is ideal for spring and autumn harvests, in open field and in hydroponics.

REDIGO 3 Br2101**

The new Red Crush® multi-leaf

HR Bl: 16-37EU, Nr:0 **IR** Fol:1

Improving Redigo 2 with aphid resistance. Red-batavia type with incised leaves. Intense red color to the heart.

*The varieties presented under a number are available for testing until their registration in the official catalogue.

**Variety under provisional sales authorization, denomination under validation.

HYDROPONICS, CHALLENGE FOR THE FUTURE

Hydroponics is a booming production method, especially in Europe, the Overseas Departments and Territories, the Americas, Asia and Oceania. It is an innovative and very dynamic sector.

OUR COMMITMENT:

Desire for and investment in research to propose lettuce varieties suitable for hydroponics.

Research and Development exchanges with international partners: USA, Europe, Caribbean, Polynesia, New Caledonia, Colombia, Vietnam and South Korea
