SEMENCES

MELON

Between tradition and innovation

For more than 70 years, Gautier Semences lend its expertise at the service of melon producers. Located in the heart of a region rich in melon traditions, our company perpetuates a unique know-how, breeding varieties of melons with remarkable taste qualities, inherited from the flavours of melons of yesteryear.

Our range includes varieties with different shapes and colours of skin and flesh: Charentais, Italian Netted, Honeydew, Canari and Galia, which gives you the opportunity to grow melons adapted to your needs and expectations of your markets, whether for local or export.

Because we develop new varieties in close collaboration with our partner producers, we offer melons that also meet modern agronomic performance requirements: resistance, yield and shelf-life regardless of your production method.

Gautier Semences is also firmly committed to organic farming. We offer a wide range of organic seeds, especially in the Charentais type, to support you in production that is respectful of the environment and consumer health.

CHARENTAIS

OCITO HF1

Superior in early yield

HR Fom:0,1,2 IR Px:1,2,5/Ag

- Short cycle and grouped harvests
- Resistance to Aphid and good tolerance to Powdery mildew
- Good commercial yield
- Excellent shelf life
- Fruit of attractive presentation: 90% purchase intention at first glance⁽¹⁾

FARAON HF1

The Fusarium solution

HR Fom:0,1,2 IR Fom:1-2/Px:1,2,5/Ag

- Very good performance against Fusarium wilt
- Resistance to Aphid and good tolerance to Powdery Mildew
- Sweet flavor, intense and fruity aromas

JENGA HF1

A delight to savor all summer long

HR Fom:0,1,2 IR Gc:1/Px:1,2,5

- Powerful root system and very good field standing ability
- High commercial yield
- Very attractive presentation
- Very good flavor/sugar balance

TONGA HF1

Security for the heart of the season

HR Fom:0,1,2 IR Gc:1/Px:1,2,5,3-5/Ag

- Reinforced resistance to Powdery mildew and Aphid
- Good production potential
- Good post-harvest shelf life
- Fairly crunchy and juicy flesh

JUBILO HF1

Reinforced resistance for the end of the season

HR Fom:0,1,2 IR Px:1,2,5,3-5/Ag

- Very good resistance to Powdery mildew and Aphid
- Fairly grouped and very productive harvest
- Excellent shelf life
- Juicy, sweet and fragrant fruit

(1) Purchasing intention, independent agency study, June 2021

ROBINSON HF1

Historical and tasty variety

HR Fom:0,1 **IR** Gc/Px:1,2

- Very attractive variety
- Good fruit setting
- Well coloured flesh
- Very good taste qualities

CYRANO HF1

Early and tasty

HR Fom:0,1,2 **IR** Px:1,2

- Very good performance against Fusarium wilt
- Resistance to Aphid and good tolerance to Powdery Mildew
- Sweet flavor, intense and fruity aromas

BACHA GSC1777 HF1

The long shelf life for exportation

HR Fom:0,1,2 **IR** Px:1,2,5,3-5/Ag

- Aphid and powdery mildew resistance race 3-5
- Early vigorous plant with good resistance in hot conditions
- High yield potential
- Centered and homogeneous caliber throughout the cycle
- Excellent post-harvest fruit shelf life
- Optimal quality for the export market
- Nice netted fruit
- Good brix level and juicy flesh

David MADIOT
Crop Portfolio Lead

We offer a diverse range of melon varieties that meet the multiple expectations of the sector, first and foremost those of producers. Our varieties guarantee a safe productivity thanks to very good yield performance and effective resistance against bioaggressors such as aphid and oidium. These resistances are essential to offer you more peace of mind in the conduct of your crops, they also help to reduce the use of phytosanitary products, having the beneficial effect of healthier products for consumption but also significant savings made on inputs.

The flexibility of our products ensures optimal production under various conditions, indoor or outdoor, even facing the increasing challenges of global warming.

You have a particular need? Do not hesitate to contact our field specialists to collaborate on new projects. By choosing Gautier Semences, you opt for a close relationship based on the passion of quality products and the satisfaction of each.

OTHER TYPE

COSTIBEL HF1

Costelet®, the character of a traditional melon

HR Fom:0,1

IR Px:1,2,5/Ag

- Vigorous plant
- High fruit setting rate
- Cream green color when ripe
- Smooth and ribbed skin
- Very sweet and fragrant orange flesh with musky notes

GRISELET HF1

Le Griset®, an exquisite perfume of yesteryear

HR Fom:0,1,2

IR Ag

- Excellent yield and grouped harvest
- Vigorous plant
- Good root system
- Green-gray color, slightly golden when ripe

- Early and grouped harvest
- Vigorous plant with excellent field standing ability
- Good netting and presentation of the fruit
- Round oval shape
- Good post-harvest shelf life
- Good brix° degree
- Firm and tasty flesh

SANGORY HF1

Honey dew type for early crops

HR Fom:0,1,2

IR Ag

- Resistance to *Aphis gossypii*
- Plant with good vigor, good fruit setting
- Homogeneous caliber
- Smooth, round-shaped fruit, with a reduced pistylar scar
- Juicy and very aromatic flesh

GSD2055 HF1

The yellow netted rich in sugar

HR Fom:0,1

IR Px:1,2,5,3-5/Ag

- Galia type exterior presentation
- Yellow color when ripe
- Very sweet orange flesh
- Strong and vigorous plant throughout the cycle
- Excellent yield potential
- Excellent shelf life

GSD2056 HF1

The mini melon high in colors and flavors

HR Fom:0,1,2

IR Px:1,2,5/Ag

- Charentais fruit type
- Distinctive yellow color at maturity
- Mini fruit ideal for individual consumption
- Very aromatic and sweet orange flesh
- Very good plant vigor with high yield potential

SIROCCO HF1

A juicy and sweet flesh

HR Fom:0,1

- Early variety of yellow canary type
- Beautiful smooth fruit
- Goldy yellow skin at maturity
- White, firm and sweet flesh

PRECIOUS HF1

High taste potential

HR Fom:0,1,2

IR Px:1,2,5/Ag

- External appearance of Galia type
- Yellow color when ripe
- White flesh with fruity flavors
- Intensely fragrant fruit
- Good yield potential

OUR RANGE IN DETAIL

Variety	Skin	Flesh colour	Crop type	Vegetative cycle	Grouped harvest	Medium weight (kg)	Harvest stage	Résistances	
								HR	IR
CHARENTAIS
