INTERNATIONAL MARKETS

CAULIFLOWER

UBAC

The best against downy mildew

CYCLE: 75 - 85 DAYS

Suitable for autumn harvest.

Very white curd without hairiness, firm and compact with a good tolerance to knocks.

Healthy inner leaves, strong and tight to the curd.

Uniform grade and presentation.

Good behaviour facing downy mildew. Grouped harvest.

BALZAC

An outstanding foliage

CYCLE: 80 - 95 DAYS

Suitable for autumn harvest.

Round white heavy head.

Dense and solid curds tolerant to knocks.

Excellent foliage quality. Really good covering of the curd with solid inner leaves.

Good behaviour against Tip Burn.

GAUTIER
seeds

SERAC

The quality curd

CYCLE: 70 - 80 DAYS

For late summer and early autumn harvest.
Short cycle variety.
Dense, big size and very white curd.
Vigorous and semi-erect plant.
Grouped harvest. Can be suitable for spring cultivation.

PLESSI

For versatility, use Plessi

CYCLE: 75 - 85 DAYS

For late spring, summer and early autumn harvest.
Short cycle variety.
Dense, white and smooth curd.
Vigorous plant. Dark green upright leaves that assure a good protection of the curd.

P214*

Ideal for processing

CYCLE: 90 - 100 DAYS

Suitable for autumn harvest.
Nice white head well-rounded and well wrapped.
Dense and solid curds.
Easy to cut and to pack for the fresh market.
High percentage of medium size florets for processing.

T265 DUBROCA

Good tolerance to climate hazards

CYCLE: 100 - 120 DAYS

For late autumn harvest.
Round, white and big size head. Dense, solid and heavy curds with a good tolerance to knocks.
Strong and vigorous plant.

T265

DRAKAR

The one for winter

CYCLE: 130 - 150 DAYS

Suitable for early winter harvest.
White curd very smooth and well covered.
Upright foliage, robust and strong.
Nice blue-green leaves.
Homogeneous and grouped production. Good resistance to cold.

*The varieties presented under a number are available for testing until their registration in the official catalogue.
