TOMATO

Taste creates value

Tomatoes come in a wide variety of shapes, colors, textures and flavors. At Gautier Semences, our range reflects this diversity, meeting the needs of different markets, distribution channels and consumer expectations.

Taste is at the heart of our breeding work. Because it contributes to consumer enjoyment, product differentiation and market value, we develop varieties that combine outstanding eating quality with strong agronomic performance.

Today, our range is entering a new phase with the introduction of our first ToBRFV-resistant varieties. We are taking this step with the same high standards: providing greater security for growers while preserving fruit quality and taste.

Our teams are here to support you in your varietal choices and to work with you in developing solutions tailored to your markets and production conditions.

Marin BOURAYNE
Area Sales Director

GSPP
Good seed and plant practices

Since July 1, 2011, Gautier Semences has been accredited with GSPP: Good Seed and Plant Practices.
GSPP is an international, transparent business chain system whose purpose is to prevent tomato seed and plant lots from being infected by Clavibacter michiganensis subsp. michiganensis (Cmm). This accreditation covers the entire process of design and production of varieties. This accreditation demonstrates the commitment of all teams in Gautier to deliver the highest level of quality on the market.

Recommended crop: Heated soilless greenhouse · Heated greenhouse · Unheated greenhouse · Open field

Possible crop: Heated soilless greenhouse · Heated greenhouse · Unheated greenhouse · Open field

ORG Varieties available in organic seeds, subject to availability.

NEW Variety under provisional sales authorization, denomination under validation.

The standard abbreviations

ToBRFV: Tobamovirus fructirugosum
ToMV: Tobamovirus tomatotessellati
TSWV: Orthotospovirus tomatomaculae
TYLCV: Begomovirus coheni
Pf: Passalora fulva
Fol: Fusarium oxysporum f.sp. lycopersici
For: Fusarium oxysporum f.sp. radicis-lycopersici
Pn: Pseudoidium neolycopersici
Va: Verticillium albo-atrum
Vd: Verticillium dahliae
Pl: Pseudopyrenochaeta lycopersici
Ma: Meloidogyne arenaria
Mi: Meloidogyne incognita
Mj: Meloidogyne javanica

HR High/standard resistance

IR Intermediate/moderate resistance
